

## Opening and refill mechanism.

### Sequence 1: Opening

The product is 97 mm in height and 33.7 mm at its widest point.

The product is opened at the top by applying pressure to the top and twisting anti clockwise.

The top is then removed.

### Sequence 2: Refilling

1. Pull out the pod
2. Add e-liquid through the slot
2. Pull out the rubber plug on the slot
4. Press the rubber plug back carefully and firmly

### Sequence 3: Closing

To close the product reapply the top.

Pressure is applied combined with clockwise twisting until tight.
